## Data sheet

### SKA ROPE CLAMP

After a fall, the injured person is often hanging inaccessible in free space, such as below the edge of the fall. The SKA ROPE CLAMP is used as a rescue rope clamp to create an anchor point on the lanyard of an accident victim. In this case, the rope clamp is placed on the lanyard or fall arrester rope of the casualty. This allows the casualty to be lifted until the casualty's lanyard is unloaded.

#### FEATURES

Hand-washing:	40 °C
Max. service life:	10 Years

#### DIMENSIONS

Size:	0,13
Weight:	0,77 kg

#### MATERIAL

Material:	Stainless Steel
